### **DETAILED ACTION**

1. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

2. Claim 20 is rejected under 35 U.S.C. 102(b) as being anticipated by Hugo (US 6,194,484).

Hugo teaches a coating material comprising first IR reflective flakes (i.e. (b) component) and second IR transparent particles; that is particles that have a degree of transmission in the IR region (i.e. (c) component). See Hugo, col. 2, lines 15-50. The flakes and particles are present in a coating material comprising a binder (col. 2, lines 10-14). Therefore, the binder necessarily causes second particles to coat on the surface of the first flakes. The coating is applied to control solar radiation (col. 1, lines 55-62).

### ***Allowable Subject Matter***

3. Claims 1-4, 7-18 are allowed.

4. The following is a statement of reasons for the indication of allowable subject matter: None of the prior art references of record, singly or combined, teaches or suggests a composition comprising core-shell flakes wherein the flake core having specific surface roughness and texture as claimed.

### ***Conclusion***

5. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP

Art Unit: 1794

In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
